

## CPD Seminar Announcement:

### Solutions to common problems in the installation and performance of underfloor heating systems

The design of an underfloor heating system is about much more than the pipe these days. As manufacturers and installers of one of the widest ranges of screed based and dry installed underfloor heating systems in Europe, Jupiter Heating Systems are able to provide advice backed up by many years of experience.

That's why, when you contact Jupiter Heating Systems you'll find that we want to know about your heat source, the floor finishes, the performance requirements of the floors, ecological requirements and many other factors.

Only when we have a good understanding of your requirements will we propose a solution. Many of our solutions are unique and mean that underfloor heating can be used with confidence when you thought it may not have been possible in your project.

We won't try and sell you a heat pump, a boiler or a renewable energy source because we would rather be experts in one area and guide you towards companies with whom we have worked successfully in the past.

Our projects vary from small extensions, through domestic new build and refurbishment, schools, universities and hotels to social housing schemes.

We pride ourselves in the quality of our service and post installation support.

#### Our CPD seminar:

#### Solutions to common problems in the installation and performance of underfloor heating systems

Is certified as providing 1 hours development, the main contents of the presentation are:

A comparison of screed and dry-installed systems

Floor finishes and their effect upon heat outputs

Running costs and system controls

Compliance with Part L of The Building Regulations

Solutions to Part E of The Building Regulations

Product innovations (wall heating, floor and ceiling cooling, wet rooms, levelling)

The Seminars are provided at your offices, normally during your lunch break and we are happy to fund a buffet lunch to keep both your bodies and mind fed on the day.
