

CPD Seminar Learning Objectives

Solutions to common problems in the installation and performance of underfloor heating systems

Training level:

This presentation is defined as Intermediate Level – appropriate for all levels. Novices and experienced participants alike will benefit, gaining general understanding and comprehension of the material.

Initial Information:

For those who are new to underfloor heating a briefing document, “*An introduction to underfloor heating*” is available. This document introduces the principles and concepts behind underfloor heating compared with conventional radiator systems and should be read before the presentation.

Learning Objectives:

By the end of the seminar the attendee will have achieved the following objectives:

An understanding of the difference between dry installed and screed based warm water underfloor heating systems.

Recognition of the importance of the following factors in the performance of underfloor heating systems:

- Response times
- Heat outputs
- Running costs

A familiarity with the range of load-bearing surfaces available and their specific benefits

An awareness of the specific requirements of The Building Regulations Parts E and L in connection with underfloor heating systems and the range of solutions available.

Location.

Our seminars are normally held at your offices, subject to a minimum of 5 attendees. We also hold seminars at our office in Chobham, Surrey allowing groups to be made up from a variety of practices.
